Smarter Compressor Technology

Gardner Denver High Pressure Compressors

With the Belliss & Morcom, Gardner Denver and Reavell Compressors we have grown into one of the world's most respected organisations within high compression technology.

We build our future with total respect for our unique heritage and by demonstrating our passion for our global brands through technology leadership.

Our team is professional, customer focused and leaders in their field ensuring you are equipped with exactly the right high pressure solution.

Protect Your Investment with Confidence

Our class leading compression systems are supported by some of the industry's most experienced aftermarket professionals.

Dedicated to supporting you with commitment and professionalism, we provide a wide range of parts and a service that is responsive and flexible.

Our expertise delivers a comprehensive parts and service support package that is accessible for the service life of your compressor.

Aftermarket Products & Services

- Fixed cost preventative maintenance
- Compressor and component refurbishment
- Enhanced product upgrades
- On site commissioning and training
- Full turnkey installations
- Unrivalled product & technical support

Global Support Services

Gardner Denver understands the challenges facing our global client base in today's changing environment and takes pride in offering an exemplary global aftermarket solution covering spare parts, service and support. Our global teams fulfil all service requirements throughout the life cycle of your equipment. Effective, preventative maintenance of your high compression systems not only ensures uninterrupted process stability, but offers the additional security of scheduled maintenance programmes.

Choosing our aftermarket professionals offers you a comprehensive service support package that can continue far beyond the initial installation phase.

As part of our life cycle commitment, Gardner Denver can additionally offer you a total solution approach, proving peace of mind within an extended service contract framework.

Service Support

Gardner Denver's skilled engineers offer 365-day service support for its compressors. The most popular high-quality consumable parts are held in stock, with availability to dispatch quickly across the globe.

Our flexible servicing options guarantee the use of genuine Gardner Denver parts and lubricants to ensure your compressor runs at optimum performance. Meanwhile, Gardner Denver's continuous drive for product development and design means that your compressor incorporates the latest technological enhancements.

Putting Service Into Perspective

We recognise that customers have different priorities for different production processes. Our maintenance packages have been designed to reflect this. Scheduled maintenance is a core features of every package. Cover for any unscheduled aspect of maintenance does vary as this allows our customers to select the most appropriate package according to the operational importance of their compressor to their business.

Warranty Programmes for High Pressure Compressors

All Gardner Denver High Pressure compressors have been designed to provide many years of trouble free service, however even the most reliable products require regular service and maintenance. This is why Gardner Denver provide as standard a 12 month manufacturer's warranty, with the added option of extending the warranty period should you wish to enter in to one of our Total Care Maintenance & Warranty Plans.

Our Total Care Maintenance & Warranty Plans offer a commitment to safeguard your business against costly unexpected and unscheduled repairs, whilst continuing to extend your warranty period for the duration of the agreement.

The primary benefits of the Gardner Denver Total Care Maintenance & Warranty Plans are as follows:

- Extended manufacturers' guarantee from commissioning date
- Low cost scheduled maintenance, carried out by factory trained technicians
- Optimum compressor performance and high operating efficiency
- Elimination of unexpected repair costs
- 100% original spare parts – with proven performance and reliability
- Parts stocked locally
- Increased compressor and plant availability
- Only scheduled services required each year, increasing compressor and plant availability
- Annual maintenance and operator training for the customers technicians
- Detailed quarterly inspections
- Automatic upgrade to any new parts designs / materials as they are released by the factory
- Ongoing maintenance and operator training for the customers technicians
- Minimises customer exposure to Health & Safety risk
- Flexible payment plans so you can budget accordingly
- The Total Care and Warranty can be further extended beyond the initial time period, by agreement

BellissMorcom
Reavell

“In summary, we offer **Complete Peace of Mind** for your compressor operation, eliminating the risk of any **unforeseen costs**, thus enabling you to focus on your **own plant and operations**”

Genuine Parts

Gardner Denver is the only source for parts fulfilling the stringent manufacturing standards needed to ensure uninterrupted equipment performance.

Designed and produced to the highest standards to ensure correct fitment, genuine parts secure optimum performance and life span efficiencies.

With genuine spare parts you will be able to secure maximum equipment availability and eliminate the risk and quality problems of non-original spares. Naturally all our fastest moving items are available ex-stock or on short lead times.

For additional peace of mind, we are the only ones with the complete original machine records to ensure full service enquiry back-up facilities.

Comprehensive Parts Stock Holding

Stock holding around the world means parts can be dispatched from our support centres within hours of order.

Convenient Service Packs

Services packs and kits provide all the necessary components to carry out field services and repairs efficiently.

Refurbish and Recycle

Even the best engineered high pressure compressed air equipment has a limited life expectancy and after many years of faultless service can become less efficient – Potentially costing you valuable time and money.

Refurbishing your Gardner Denver compressor will extend its working life.

Our refurbishment service offers:

- Full diagnostic evaluation of performance
- Analytics to identify refurbishment requirements
- Restore the compressor to optimum operating performance
- Fully tested to comply with all quality standards, including non-magnetic testing
- Site visits, where possible, to assess compressor performance

All of this saves you time and money and avoids unplanned downtime.

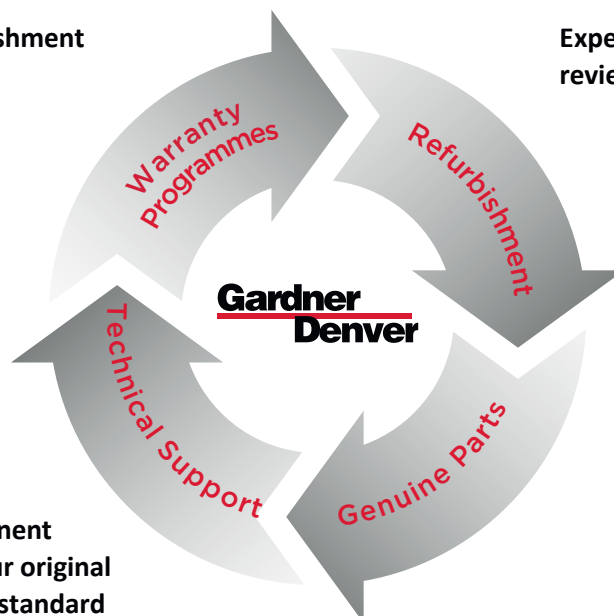

With one of the industry’s most experienced refurbishment teams based in Redditch (UK), Gardner Denver can offer your business a full diagnostic evaluation and recommend a programme of refurbishment which will bring your existing high pressure system back to optimum operating specification.

On completion of refurbishment work we will revalidate your warranty

Experienced factory engineers to rework your compressor from component level and bring back to our original factory specification and standard

Experienced engineers to review/inspect your system

Report created to identify work required
